ASSOCHAM India organized a conference on "Holistic Approach in Constructing Sustainable Buildings" and Installed GEM Gujarat Chapter in Ahmedabad in August 2019.

Prof. Charanjit Shah moderated the event and presented upon "Creating sustainable smart cities" at GICEA, Ahmedabad. The presentation talked about creating smart habitats by basic practices and modern interventions.

Large Span Structures by Smart Habitat Foundation

WORKSHOP

Numerous architects, industrialists and civil engineers were invited to present on **large span structures, steel structures, and architectural practice**. Professionals like Er. Praween K. verma, Pradeep Verma, Ar. Rajat Srivastava, Er. Arjoon Garg, Ar. Ravi Shankar, Ar. Amit Khullar and Ar. Vinit Khanna were part of the same. We also **felicited Prof. Prem Kumar Chaudhery** for his exemplary contribution of more than 61 years as an architect and academician.

GOPINATH MUNDE MEMORIAL

ONGOING PROJECT

**'Creating
ICONICITY
through form'**

The project is focused on creating a structure which becomes an iconic landmark while also keeping intact the approach to sustainability.

AGARTALA AIRPORT

ONGOING PROJECT

"Simplistic Dynamism inspired from the local Bamboo Art"

ILM RANCHI

ONGOING PROJECT

To create a built form with passive design strategies aiming at a NET ZERO CAMPUS.

'The contemporary spiritual Gateway of India'

The project takes inspiration from the contrasting city skyline of the city and is aimed to create a connection between the traditional and modern architecture.

Inspired from the 'KHANDA' - Symbol of Oneness and Humanity

The project aims at breathing life through art and architecture. It pays a tribute to Guru Nanak Dev Ji's philosophy and life events.

PUBLICATIONS

Our article on 'Redefining Urbanity' in the August 2019 issue of NBM&CW magazine - Presenting a new vision for Chandni Chowk, Delhi

Rethinking Design and Urbanity for Creating Eco friendly Sustainable Spaces

Urbanisation is a huge challenge, particularly in cities where the built-up area is limited and the demand for space is increasing.

The idea of sustainable is commonly understood as green, pollution-free, integrated, healthy, balanced, and resilient. It is not just about green buildings, but also about the way we live and work. It is about creating a sustainable environment that meets the needs of the present without compromising the ability of future generations to meet their own needs.

There is a growing need to rethink urbanity and sustainability. It is not just about green buildings, but also about the way we live and work. It is about creating a sustainable environment that meets the needs of the present without compromising the ability of future generations to meet their own needs.

Old Delhi holds many ancient heritage that characterizes the richness of the socio-economic, cultural and architectural growth over time. The 'Walled City' in the Chandni Chowk, Delhi, was and still is considered as one of the largest and oldest markets in India.

Chandni Chowk, Delhi, is a vibrant and bustling market area that has been a part of the city's history for centuries.

It is a place where the old meets the new, where the traditional meets the modern. It is a place where the past is alive and the future is being created.

Our research Article was published in Insights Success Magazine which focuses on 'Redefining the Public spaces of Delhi.'
